

Malnutrition Awareness Week

Highlights From MAW24

In 2012, ASPEN recognized the need to raise awareness about malnutrition and its negative effects on individuals' health, the economy, and our communities, which resulted in the creation of Malnutrition Awareness Week™ (MAW).

With the support of organization ambassadors, corporate sponsors, and collaboration with like-minded societies, MAW has grown exponentially around the world, reaching millions of healthcare professionals, government leaders, community agencies, patients, and caregivers.

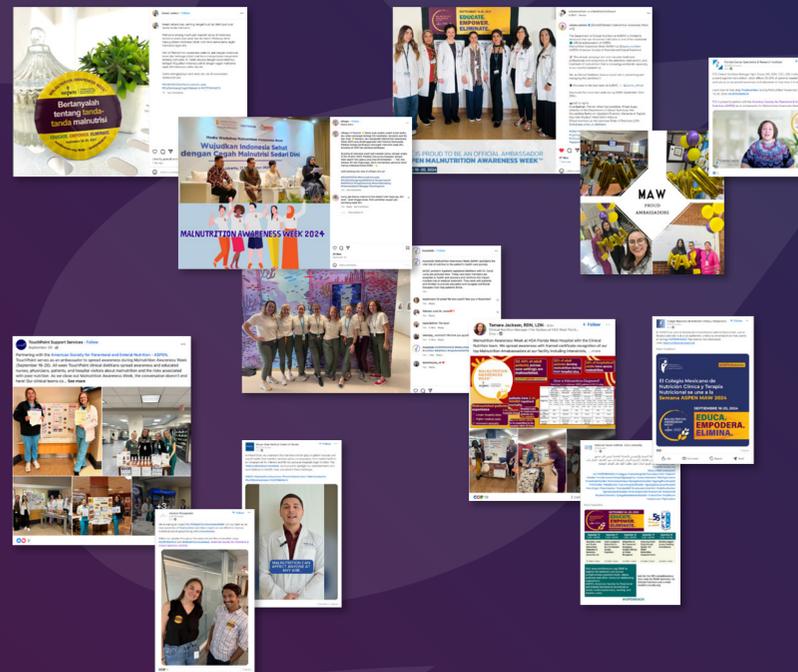

ASPEN's Malnutrition Awareness Week has inspired over 15 PEN societies to organize their own MAW.

Healthcare professionals from **58 countries** participated in MAW webinars.
