Be ALERT

Aseptic Technique
- For preparation and delivery of enteral formula
- Practice good hand washing technique
- Wear gloves when handling feeding tube*
- Avoid touching can tops, container openings, spike and spike port

Label Enteral Equipment
- Patient name and room number
- Formula name and rate
- Date and time of initiation
- Nurse initials

Elevate HOB
- ≥30°

Right Patient
- When clinically possible
- May mitigate risk of reflux and aspiration of gastric content

Right Formula
- Match formula and rate to patient’s feeding order

Right Tube
- Verify ENTERAL tubing set connects formula container to feeding tube
- Avoid misconnections – trace all lines from origin to patient
- Only enteral-to-enteral connections

Trace All Lines and Tubing Back to Patient

* Per facility policy and procedure.
