

Parenteral Nutrition Education and Training Programs

American Society for Parenteral and Enteral Nutrition (ASPEN)

- General Webinars that may have PN content <http://www.nutritioncare.org/webinars/>
- Parenteral Nutrition Order Writing Workshop (PNW-2019) ASPEN 2019 Conference March 23rd 7A-4P The workshop is designed to train clinicians to assess a patient requiring parenteral nutrition (PN) and subsequently initiate and manage the PN therapy for that patient.
- Intravenous Lipid Emulsions (ILE) Video Series
Designed for clinicians who provide nutrition support, the **four-part video series** addresses a knowledge gap between best practice recommendations and current practices in parenteral nutrition (PN). This program was supported by an educational grant from **Fresenius Kabi**.
- Multi-Chamber Bag Parenteral Nutrition (MCB-PN) Video Series – NEW
Designed to educate clinicians on the appropriate use of multi-chamber bag parenteral nutrition, the **four-part video series** addresses all appropriate PN options for their patients. This program was supported by an educational grant from **Fresenius Kabi**.
- Parenteral Nutrition Safety Series & Certificate Program In response to the recommendations, ASPEN developed a **training series** in 2015 to educate all members of the healthcare team who work with PN to optimize your knowledge base of safe PN practices. This program is supported in part through a medical education grant from Fresenius Kabi.
- SmartPN Video Series - NEW! Parenteral Nutrition represents one of the most notable achievements of modern medicine, and can serve as a therapeutic modality for all age groups across the healthcare continuum. It is a life-sustaining option to patients who cannot get adequate oral or enteral nutrition. However, many patients, despite the advances in enteral and parenteral nutrition are still not getting the therapy they need, especially those in the acute and critical care settings. This four-part video series will reinforce among clinicians the value of PN and how to use it safely and appropriately:
Part I: PN Appropriateness: The General Approach (Angela Bingham, PharmD, BCPS, BCNSP, BCCCP)
Part II: The Role of Supplemental Parenteral Nutrition (Kris M. Mogensen, MS, RD-AP, LDN, CNSC)
Part III: Avoiding Overfeeding and Glucose Control Management (Todd Mattox, PharmD, BCNSP)
Part IV: Venous Catheter Selection, Care, and Complication Prevention (Patricia Worthington, MSN, RN, CNSC)

American Society of Health-System Pharmacists (ASHP)

- [Compounding Sterile Preparations: ASHP's Video Guide ... - ASHP Store](#)
