

January 22, 2021

Dear Valued Customer,

As a follow-up to our letter dated January 15 regarding INFUVITE supply, we currently expect both Pediatric and Adult single doses to be available beginning the week of January 25. As we ramp up inventory levels of single dose over the coming weeks, INFUVITE will remain on protective allocation. Adult and Pediatric bulk package INFUVITE are not available at this time and allocation limits have been converted to single dose based on historical purchase of bulk packages. We will continue to provide updates on supply as additional information becomes available from our third-party manufacturer.

Please see Table A for allocation limits.

Table A

Product Description	Product Code	National Drug Code	Group Allocation
