

July 20, 2023

Dear Valued Customer,

Due to a third-party manufacturing issue, Baxter is experiencing a supply constraint on EVA bag codes beginning with H9387XX. As a result, Baxter will be placing the following codes on allocation effective July 20, 2023. The allocation below is based on historical purchases from January through June 2023.

Product Code	Description	Allocation
H938737	EXACTAMIX EVA BAG 250ML	100%
H938738	EXACTAMIX EVA BAG 500ML	100%
H938739	EXACTAMIX EVA BAG 1000ML	100%
H938740	EXACTAMIX EVA BAG 2000ML	75%
H938741	EXACTAMIX EVA BAG 3000ML	100%
H938742	EXACTAMIX EVA BAG 4000ML	100%
H938743	EXACTAMIX EVA BAG 5000ML	100%

Baxter recognizes the clinical significance of this product to compounding operations and recommends our E3 codes as direct alternatives to the allocated H9387XX codes. The design, structure, and format of these codes is essentially the same as the allocated codes and have already been validated for use on the ExactaMix compounder. EVA bag codes beginning with E3 are currently not on any allocation and available to order (reference chart by mL size shown below).
