

August 3, 2021

Dear Valued Customer,

Throughout the pandemic, we have experienced unusual and unpredictable ordering patterns across our product portfolio. In addition, the global healthcare supply chain remains impacted by significant freight delays. Due to these issues, we are currently seeing supply disruption of our **INTRALIPID**, IV Fat Emulsion product codes. As such we will be placing all our lipid products on a protective allocation to help ensure continuous, reliable supply so you receive at least 100% of the amount of product that you have traditionally ordered.

INTRALIPID and **CLINOLIPID** codes will be allocated at 100%, effective August 3, 2021, as indicated below. We expect the allocation to remain in place until sometime in Q4, 2021. To ensure equitable distribution of allocated products, current backorders on both **INTRALIPID** and **CLINOLIPID** products will be cancelled.
